

The Flat Folding Die

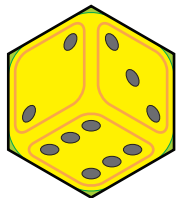

This is a folding-strip puzzle. When solved, it makes a flat hexagonal packet that shows a "normal" die as seen from two opposite directions.

Goal

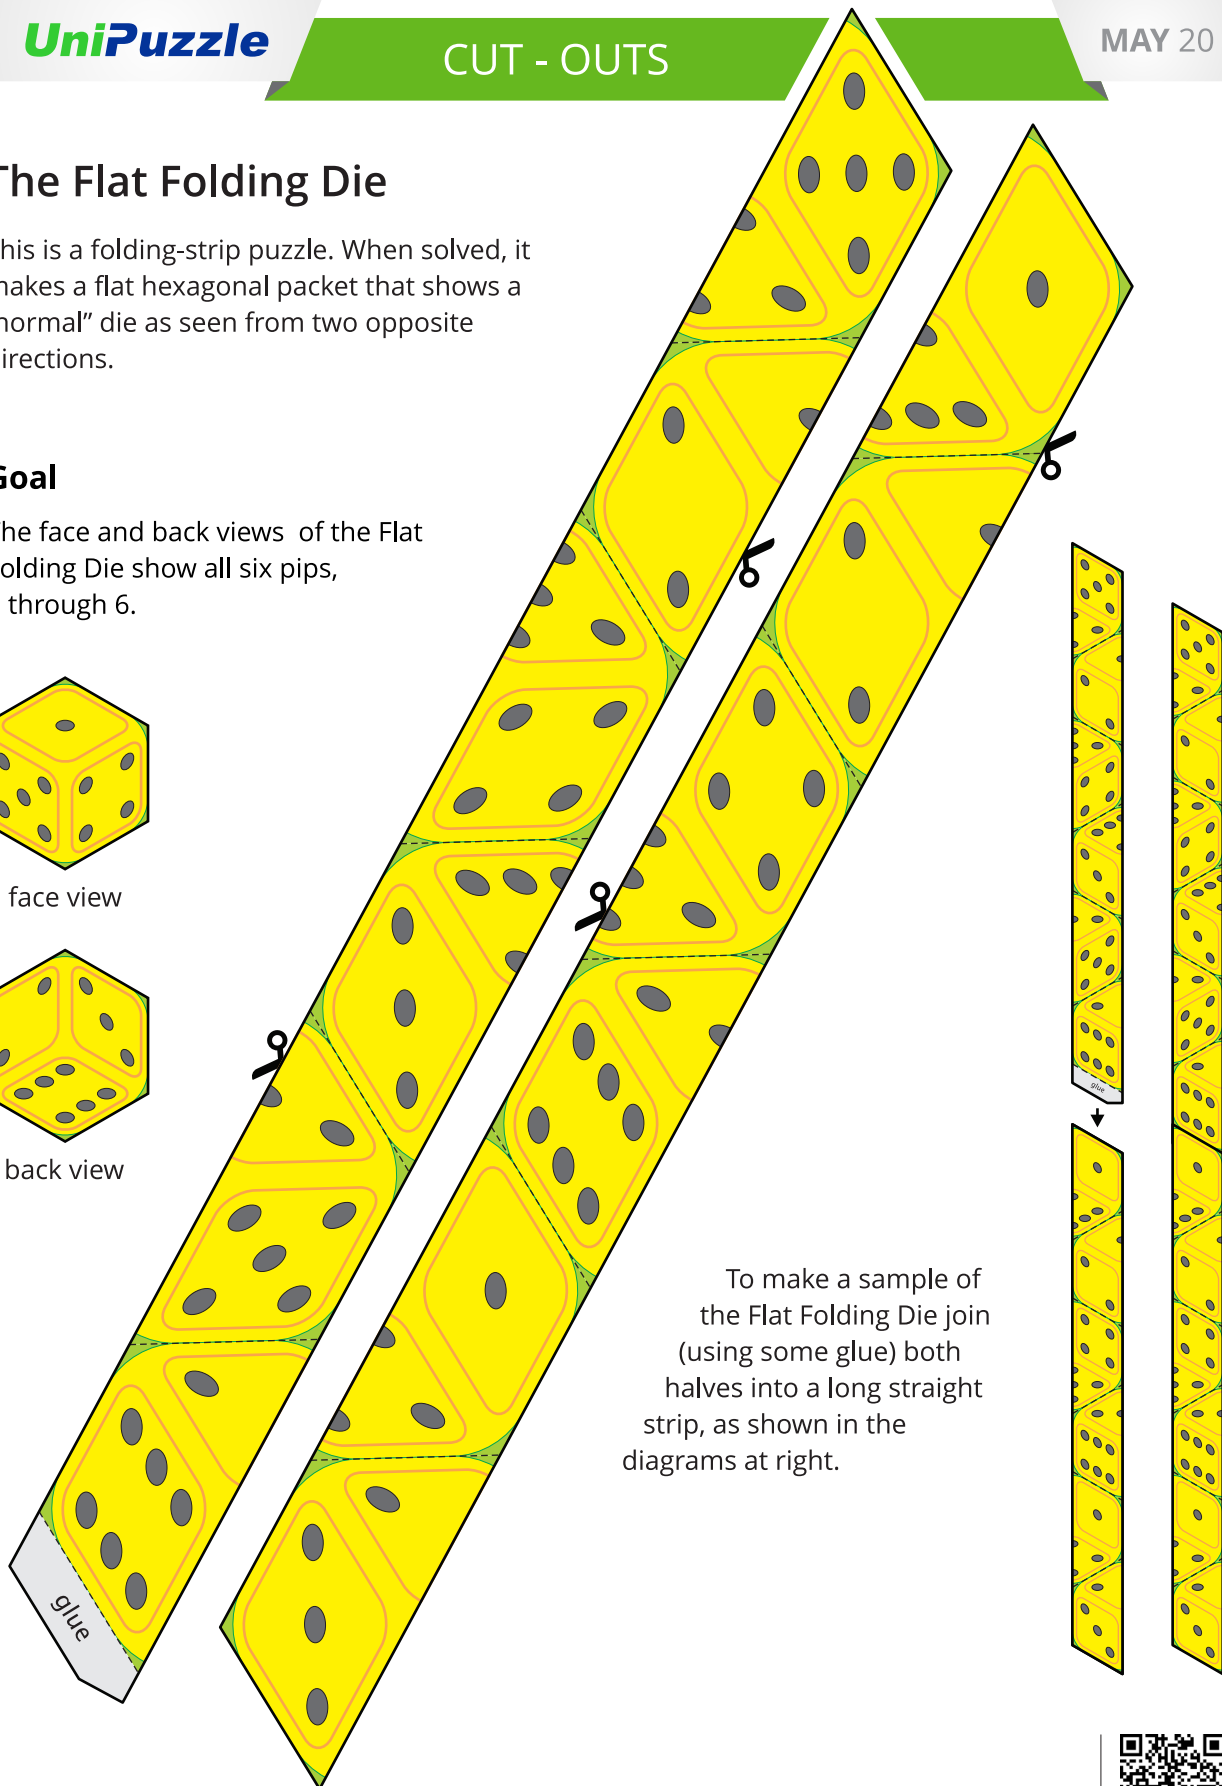

The face and back views of the Flat Folding Die show all six pips, 1 through 6.

face view

back view

To make a sample of the Flat Folding Die join (using some glue) both halves into a long straight strip, as shown in the diagrams at right.
